  - **output: 5V DC, 1000mA**
- **Power the phone under standard conditions:**
  - **5V DC, 500mA**
- **Smartphone`s weight: 138g**

1.Before first use

SIM card inserting

myPhone S-Line is a mobile phone using Dual SIM technology. Dual SIM allows you to use two mobile networks at the same time. To insert the SIM card correctly follow the instructions:

- Turn off the phone, remove the back cover (undermining the slot located in the left corner of the base of the phone with your nail) and pull out the battery.
- Insert the SIM card into the slot following the pictures from above and below the socket.

MICRO SIM ADAPTERS

Do not install hollow (with no card) micro-SIM card adapter in your smartphone. This will cause a jam. Attempt to draw jammed adapter back from the slot can cause mechanical damage of the phone. If SIM card adapter deadlocks in the socket, you should contact an authorized myPhone service!

Memory card inserting

Use only memory cards compatible and approved by myPhone. Incompatible memory card may damage itself and the device and remove stored data. Incompatibility of memory card can be caused by incorrect card format (micro SD format is required) or unsupported card size (over 32GB). To insert the memory card correctly follow the directions:

- Turn off the phone and take off the back cover (undermining the slot located in the left corner of the base of the phone with your nail).
- The memory card slot is located above the battery on the right. Following the drawing insert the memory card into the slot.

Battery inserting

To insert the battery:

- Turn the phone back cover up.
- Take off the back cover (undermining the slot located in the left corner of the base of the phone with your nail).
- Insert the battery (pay attention to the correct orientation of the battery contacts and phone contacts – these should be adjacent to each other).
- Replace the back cover.

2.Basic information

Phone layout

Front and side view

Back view
